

Transformational Mentoring: A Psychosynthesis Coaching Training

AN 18 MONTH ONLINE TRAINING PROGRAM
FROM SEPTEMBER 2024

A profound five module training in the theory, application and practice of Psychosynthesis for those in healing professions such as astrologers, body workers, energy workers etc. This coaching training creates a flexible model for how to coach, mentor and guide others.

Each Module is priced individually at \$1800 and there are 5 modules in total.

With purchase of Module 1 and 3 you will receive the recorded content within 48 hours of payment.

MODULE 1

55 hours of high-quality video presentations of live classes given by Mark Jones. Major sections focus upon the foundations of western thought leading to Freud, and subsequent depth explorations of Carl Jung, Abraham Maslow & Carl Rogers.

Jung: The evolution of his work, the discovery of the collective unconscious, anima and animus, shadow, principle of individuation, spirit of the depths vs spirit of the time.

Maslow: the foundational principles of humanistic psychology, Carl Rogers: the foundation of the person centered approach. Contribution of Melanie Klein and the depressive position.

The next focus contains an extended introduction to Psychosynthesis itself including the assimilation of materials gleaned from multiple research visits to the archive of Roberto Assagioli in Florence. We consider how he formed a vision of a psychology that was explicitly spiritual from the very beginning of his thought process; an exploration of his famous map of consciousness, the Egg Diagram and of its key insight representing the human energy field. The I – Self axis reveals Assagioli's

profound vision of personal growth. Finally, an extended section covers the nature of the therapeutic relationship using Psychosynthesis and its energetic model of the human soul as the basis for understanding. We explore the nature of the Knowing Field that exists between coach and client and the emotional dynamic that underpins that in Emotional Field Theory and then the making of the self that can emerge from the relationship.

MODULE 2

Ongoing small group supervision and mentoring with Keith Hackwood. These groups are intended to provide the individual with opportunities to express their questions and growing understanding of Psychosynthesis, using the dynamics of personal growth directly as well as being an active witness in the process of others. The interaction with and support of the group becomes a crucial component in learning to be a skillful, effective coach.

MODULE 3

This Module starts with a live weekend titled Psychosynthesis in Time followed by 40 hours of highly curated video content pre-recorded with a dynamic visual balance between Mark as a speaker and the illustrated content.

Next in the sequence is the 12 part Principles of Healing: Establishing connection, CSI Healer, True Witnessing, Spiritual Emergence, Goals and Creativity, Crisis and Morals, Resistance, The Angel vs Resistance, The Song of Myself, In Search of Soul, The Paths, The Vale of Soul Making Parts 1 & 2, The Mammalian Loyalty Project, Child Rescue Dynamics, The Magnetism of the Family, Trauma as Loyalty, Working with Resistance, The Sea Wall, Stages of Change.

The True and False Self is then presented in 5 major sections; Spiritual Experience and Conscience, and The Idea of a Path Parts 1-3.

In Module 3 we also come together as a full group in live Q&A – the process that will become the mainstay of the course in module 5.

MODULE 4

Ongoing small group supervision and mentoring with Keith Hackwood. These groups give the individual a chance to express their questions and dynamics of personal growth directly as well as being an active witness in the process of others. The interaction with and support of the group becomes a crucial component of learning to be a coach.

MODULE 5

Group Process – here there are a series of opportunities to operate in a group setting with both Mark and Keith. We will use a combination of pre-selected texts prepared for you in order to encourage dialogue and open Q&A. When the course ends you will have the option to include a certification process.
